Personal summary

Fullstack Developer with over 6 years of experience building web applications, APIs, and distributed systems using Node.js, TypeScript, React, and Next.js. I've worked on legacy system migrations, performance improvements, and microservices in cloud environments such as AWS and GCP. I've collaborated with distributed teams to deliver and maintain production systems that are scalable, stable, and easy to evolve over time.

Experience

Dedupely Inc | Fullstack | Canada | <https://dedupe.ly/> | Jan 2025 - Current

Technologies: PostgreSQL, Prisma, SvelteKit, TypeScript, GCP

- Contributed to the migration of a legacy DLang application to SvelteKit 5, helping modernize the tech stack and improve maintainability.
- Implemented new platform features and frontend enhancements to improve user experience and functionality.
- Developed and modify site components
- Modified and maintained database schemas using Prisma migrations.

BNN The Digital Partner | Fullstack | CDMX | <https://www.bnn.mx> | Oct 2022 - Nov 2024

Technologies: NodeJS, MongoDB, Typescript, React(Next), Elastic Search, AWS

- Migrated all projects deployed on the Heroku platform to AWS.
- Refactored the project code base using Node.js, Express, and PostgreSQL on the backend.
- Upgraded the Next.js framework and improved application performance.
- Provided support for website and mobile app endpoints for OcesaMX.
- • Managed DB backups and performed routine maintenance to ensure data integrity.

Kwan Tecnologia | Fullstack | Merida, Yuc. | <https://kwantec.com> | Feb 2021 - Oct 2022

Technologies: NestJS, Angular, MongoDB

- Built microservices and API resources for a technology hiring system.
- Created and modified application components and consumed external APIs.
- Developed and maintained npm libraries.
- Worked in teams using version control systems such as GitLab and Bitbucket.
- Refactored Venafi's codebase built with .NET.

CodectI | Backend | Merida, Yuc. | <https://codecti.net/28st> | Jun 2019 - Feb - 2021

Technologies: NodeJS, Express, MySQL, Firebase, AWS

- Defined technologies and project architecture.
- Designed the database using MySQL.
- Developed endpoints and web services.
- Deployed the project on AWS EC2.

Skills

Frontend: React, Next, Sveltekit, Angular, Tailwindcss, Typescript

Backend: Nodejs, Express, NestJS, Ruby On Rails

Database: MongoDB, Postgresql, MySQL, Firebase, Supabase

Tools: Github, Postman, Prisma Studio, Docker, pgAdmin, Slack, Linux, Jira, Trello

Education

Southern Yucatan State Regional University: Tekax, Yucatan | Advanced Technical Degree

Bachelor Yucatan State: Teabo, Yucatan | Speciality: Mathematic - Physicist

Language

Spanish: native

English: Intermediate - B1
